

This is in reference to proposed legislation allowing LPFM stations to take priority over FM translator service, in particular, how this would affect the radio station K-LOVE. K-Love radio is such an important national service. It serves the Christian population in our community that is usually ignored on radio. Not only does it play Christian music of a style that is not heard on other stations, it also provides non-profit groups with a way to broadcast information about local events. First Baptist Church of Norfolk uses K-LOVE to broadcast its weekly church services to people who cannot attend. Christians all over the world listen to this station and have a connection with each other. The music and DJ talk is always family-friendly, which is rarely the case on other radio stations. K-LOVE has staff pastors that counsel listeners who call in. Many people use this service every day. I am a financial supporter of K-LOVE and would be very disappointed to have this station (90.7 in my area) displaced by an LPFM broadcaster providing other programming. Please reconsider this proposal to preserve this service that I, and hundreds of thousands of others value so much. Thank you.
